

MASFi Lightpaper

By Aaron Tsai

# A Financial Blockchain Designed for Web3

January 8, 2023

<https://masfi.net>

## MASFi Lightpaper

Since Satoshi Nakamoto introduced the first Decentralized Finance or DeFi in form of Bitcoin operating on the Bitcoin public blockchain, DeFi has experienced explosive growth in 2011. Although DeFi is relatively new in the history of finance, DeFi applications in the marketplace have already demonstrated the feasibility and scalability, in providing financial services that are open, trust-minimized, non-custodial, yet trustworthy. Trustworthiness requires the test of time, as Bitcoin has already demonstrated its ability to defend against hacker attack and government intervention.

Launched in 2015, Ethereum is a decentralized blockchain that enables the creation of Smart Contracts and Decentralized Applications (dApps) to be created without any downtime, fraud, control, or interference from any third party. Ethereum network represents the first decentralized blockchain that enabled smart contract functionality, which has tremendous applications and use cases in the real world. Ethereum unlike Bitcoin, it allows other dApps to build on top of its blockchain. Inspired by Bitcoin and Ethereum blockchains, we built MASFi blockchain and HBS DeFi application on MASFi.

## The Trilemma Challenge

Ethereum is the most popular blockchain for development of applications, but it faces a problem known as the “blockchain trilemma”.

- Three different elements that are desirable in a blockchain: decentralization, security, and scalability.
- There are three options, but at most only two of them are possible to achieve at the same time. It is difficult in practice to have a completely decentralized network that is secure and scalable.

## Our Solution

MASFi – An Ethereum compatible blockchain, using Random Delegated Proof-of-Stake and Authority (RDPOSA) Consensus

- Ethereum Virtual Machine (EVM) compatible enabling interoperability between dApps created on Ethereum and other EVM-compatible blockchains.
- Completed cross-chain development with three popular blockchains: Bitcoin, Ethereum and Binance Smart Chain (BSC).

## Features

MASFi enables ultra-high speed transfers and low gas fees for tokens generated on these three popular blockchains.

- Transfer BTC, ETH and BNB within 2-3 seconds at USD0.1 gas using MASFi gas token MASX.
- Enabling dAPPs to use tokens generated on Bitcoin, Ethereum and BSC in an integrated format, such as a cross-chain wallet and a cross-chain swap.

## MASFi Technology

MASFi is a layer 1 blockchain with layer 2 function for other popular blockchains.

Token lock and release

MASFi & original chain

When BTC, ETH or BNB is sent to a HBS wallet, a MASFi dAPP, tokens are locked on the original chain. A mirror image of these tokens are created on MASFi to achieve lightning transfer & low gas fee for transfers between HBS wallets. When transferring tokens to a non-HBS wallet, tokens on the original chain are released for the transfer with the original chain transfer time and gas fee.

# Positioning

	MASFi	Ethereum (2.0)	BSC	Solana	Polkadot
Architecture	Multi-chain (Synchronous)	Multi-chain (Shard)	Single-chain (Synchronous)	Single-chain (Synchronous)	Multi-chain (Parachains)
Consensus	Random Delegated Proof-of-Stake and Authority (RDPOSA)	Casper Proof-of-Stake (POS)	Proof-of-Authority (POA)	Proof-of-History (POH)	Nominated Proof-of-Stake (NPOS)
Security	Global Security	Shared Security	Global Security	Global Security	Shared Security if Parachain connected
Cross-chain	Cross-chain Synchronization	Cross-Shards Chain	BSC Token Hub	Ethereum Layer 2	XCM (Cross-Consensus Message Format)
VM/Development	EVM (Solidity)	EVM (Solidity, Vyper)	EVM (Solidty, Vyper)	Sealevel (Rust)	WebAssembly, Substrate
Governance	On-chain	Off-chain	On-chain	On-chain	On-chain
Chain Token	MASX	ETH	BNB	SOL	DOT
Transaction per Second (TPS)	10,000	15	100	65,000	1,000
Avg Transaction Time	2-3 Seconds	5 minutes	1.5 minutes	0.4 seconds	2 minutes
Avg Transaction Fee	\$0.10	\$15	\$0	\$0.0015	\$1
Ethereum Compatible	Yes	Ethereum	No	Yes	No

# HBS Application

An all-in-one DeFi app, Designed for Everyone!

Powered by MASFi

- We first built MASFi and then built HBS, the first DeFi app running on MASFi. HBS began public beta since December 2021.
- HBS platform is open to business partners to launch their products / services or build additional features.
- HBS aims to become the DeFi infrastructure for financial, game, NFT and metaverse companies to scale Web2 users into Web3

# Management Team

**Aaron Tsai 蔡逸群** Founder

Two material SEC litigations. All cases closed. Full disclosure available

## Investment Banking

- Created 101 public shell companies
- Advised 30+ US stock market listings
- 2002 BioDelivery Nasdaq IPO, 2022 US\$604 million cash exit

## Tokenization of Assets

- Founder of STO Exchange – MASEx

## DeFi App

- Founder of DeFi App – HBS

# King of Shells

Two decades before shells became mainstream, known as SPACs today!

## THE WALL STREET JOURNAL.

### *Tsai Cashes In On 'Blank Check' Firms Whenever Others Use Them To Go Public*

#### DEALS & DEAL MAKERS

By TIMOTHY D. SCHELLHARDT

Staff Reporter of THE WALL STREET JOURNAL

Aaron Tsai is phasing out his wholesale camera business because he is just too busy starting other companies. One hundred and one, in fact.

The 29-year-old Evansville, Ind., businessman is at the leading edge of a resurgence in "blank check," or shell, companies, publicly held concerns with few if any assets, income, products, or activities, no business plan and no experienced managers.

That may sound like a prescription for

#### More 'Blank Checks'

The number of filings by blank-check companies with the Securities and Exchange Commission has climbed in recent years

Fla., which pursues "a business combination in the Internet industry," Dynadapt System Inc., of Wheat Ridge, Colo., which seeks information-technology acquisitions, and E-Commerce Group Inc., of Las Vegas.

"Internet and dot-com companies have been attractive and the bloom may not be off the rose entirely," says Richard Heller, a New York lawyer advising Acquireu.com.

The SEC won't comment publicly about the increase in blank-check companies, but it is watching closely. In May, for instance, James H. Ridinger, chief executive and president of Market America Inc., of Greensboro, N.C., and former stockbroker Gilbert Zivatsky, of Spokane, Wash., came

# Use DeFi as-easy-as Eating a Hashbrown

---

Start with a click & use wallet,  
**HashBrownSwap** DEX, lending  
to a financial supermarket

# Problems with CeFi

## Lack of Security and Transparency

Special Opportunity of the Time!

 **FTX**

 **celsius  
network**

 **BlockFi**

 **BINANCE**

- Run on the bank & multiple criminal investigations

- Fear of CeFi – Great bank run on CeFi
- Chinese ban on CEX and P2P lending
- Indian tax 30% crypto income + 1% tax deducted at source
- Italian tax 26% crypto income
- KYC Complexity

# Problems with DeFi

## Highly Complicated!

- 1 Wallet set-ups
- 2 Seed phrase & private key
- 3 Network configurations & switch
- 4 Slow speed and high gas fee

# Easy-to-use & Secure

## Streamlined Access to DeFi Services

1

### 2 steps wallet access – 0 KYC

Go to [www.hbsswap.com](https://www.hbsswap.com) and click on wallet icon

2

### Automated private key control

Hidden, no need to learn about the concept

3

### Store BTC, ETH, BNB together

Store in one cross-chain wallet

4

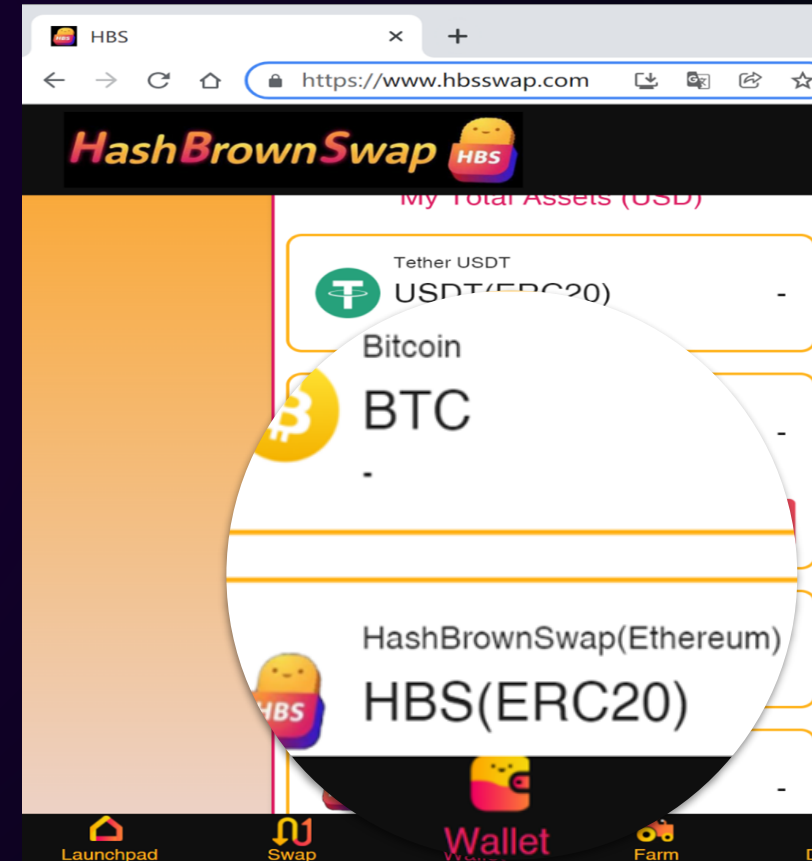

### No network configuration & switch

Cross-chain with 3 major networks

5

### Lightning transfer & \$0.10 gas

Transfer BTC, ETH, BNB in 1-3 seconds

# Competitive Landscape

# CeFi to DeFi Transition

## DeFi and DEX Market Growth

- The Global DeFi market size is USD11.78 billion in 2021
  - CAGR 42.5% from 2022–2030
- Source: Grand View Research

- 1 DEX growth faster than CEX in past 2 years
  - 2 DEX has 18.2% spot-trading volume
  - 3 DEX growth is accelerating
- Source: Citigroup

# CeFi to DeFi Transition

Designed for Global Mass Adoption!

## 1 Token Trading

Became leading CEX with Chinese market alone

- Launch regulated HBS in 2024

**HBS**

## 1 Token Trading

New token listings

## 2 P2P Lending

Collateralized with HBS, BTC, ETH

## 3 Payment

Cross-Border using BTC, ETH, USDT

# Market Traction

## Onboard 5,000 HBS Investors (Users)

# Roadmap

## Scale Web2 Investors & Users into Web3

DeFi infrastructure – Financial • Game • NFT • Metaverse

# Market Penetration

Targeting billions of non-crypto users & unbanked!

## HBS DeFi App

5,000 investors active trading

## HBS Research Institute

3x weekly online classes & offline meetings

## HBS Social Media

WeChat like features  
to attract new members

## HBS E-Commerce App

HBS tokens for payment only

## LinkedIn

Targeted marketing for  
partners, investors and users

# MAS Capital – Lead Investor

MAS Capital Inc. – US investment bank formed in 1995

MAS Capital Group, Inc. – Asia arm of MAS Capital

Shanghai MAS Capital Advisory Ltd. – Wealth management

MAS Capital (CI) Inc. – Investment company (Cayman Islands)

- Founding investor of HBS, MASFi and MASEx

# Enhanced Wallet Security

## Securely Hidden

- > No one ever sees private keys including the users

## Enhanced Security

- > Never lose tokens or wallet access
- > Unlikely to steal without a private key

## Activate via Email & Google Authenticator

- > Auto private keys control
- > No need to learn about private keys

# Competitive Advantages

## Wallet

Wallet	Cross-Chain Wallet	Lightning Transfer	Low Gas	Easy-to-use	All-in-One Services	Fee Sharing
	✓	✓	✓	✓	✓	✓
	Single cross-chain wallet storing BTC, ETH & BNB	1-3 seconds for all tokens: BTC, ETH & BNB	\$0.10 for all tokens: BTC, ETH & BNB	No APP download; Auto private key control for security	Wallet entry leads to the use of multiple services	Enabled with Smart-Contract wallet
	✗	✗	✗	✗	✗	✗
	✗	✗	✗	✗	✗	✗

# Competitive Advantages

## DEX

DEX	Cross-Chain Trading	Cross-Chain Wallet	Simplicity
	 Cross-Chain Swap for Ethereum, BSC and Bitcoin Chain Tokens	 Built-in Easy-to-use Wallet	 A CEX Experience from Wallet to DEX and more
			
			

# Token Listings

## on HashBrownSwap

**HBS**

HBS DeFi Token

**MASX 美特币**

MASFi Public Blockchain

**ATT**

Aaron Tsai Token

**CDZ**

CDzExchange Token

**NEC**

New Energy Coin

- ✓ MASFi gas token MASX MRC20 begins initial private sale on Jan. 1 2023 @USDT 0.10
- ✓ ATT is Aaron Tsai's personal social token (PST)
- ✓ CDZ is the platform token of CDz.Exchange, 2.0 to be launched on HBS
- ✓ NEC is the first Security Token to be listed on MASEx, 2.0 to be launched on HBS

# AMM Farm

## Automated Market Making

### Major Tokens: Market Price AMM

- > Market price obtained each second through oracle
- > Eliminated price slippage for BTC, ETH, BNB
  - > Single token staking
  - > First in, first out to earn

### Altcoins

- > Uniswap-like dual token staking

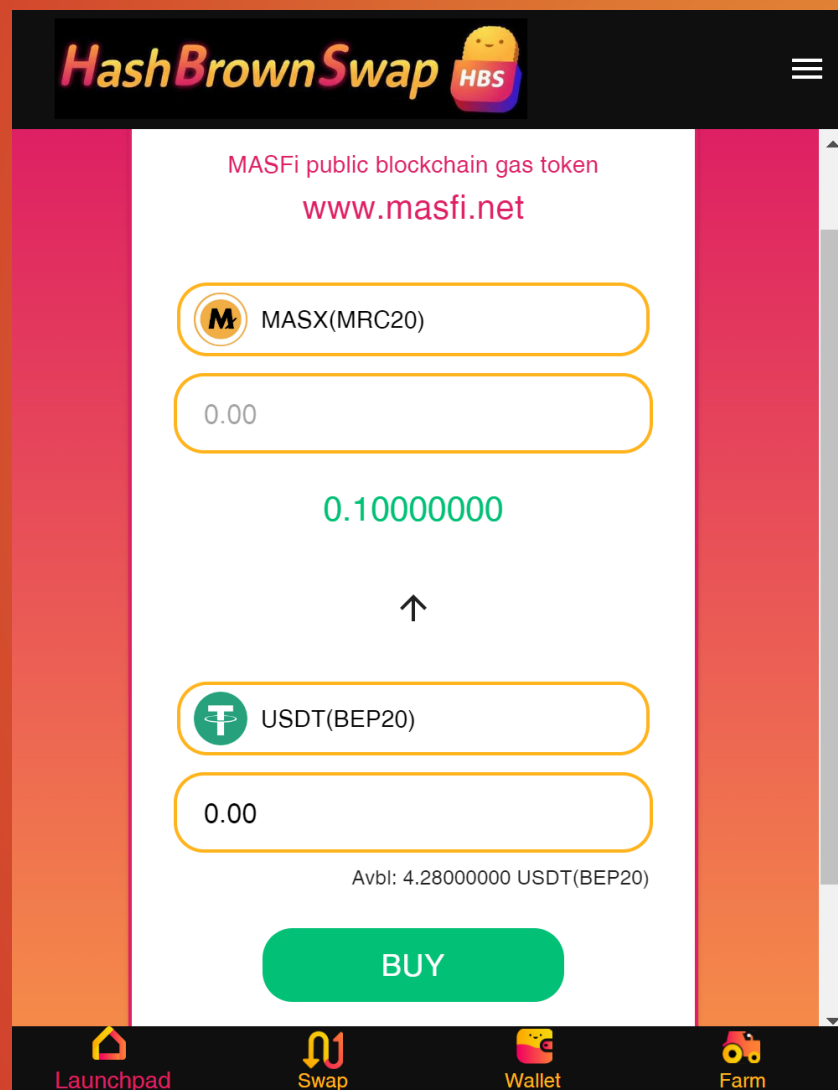

### AMM Farm Staking

- > 0.3% swap commission
- > HBS plans to charge 0.05% (1/6 of 0.3%)

[www.hbsswap.com](http://www.hbsswap.com)

# HBS Launchpad

## Fixed Price Swap

- > Buy HBS ERC20 / HBS BEP20 (closed) Ex. @USDT0.018 during IDO
- > Offering MASFi gas token MASX MRC20 @ USDT 0.10 / MASX

## Initial DEX Offering (IDO) & Security Token Offering (STO)

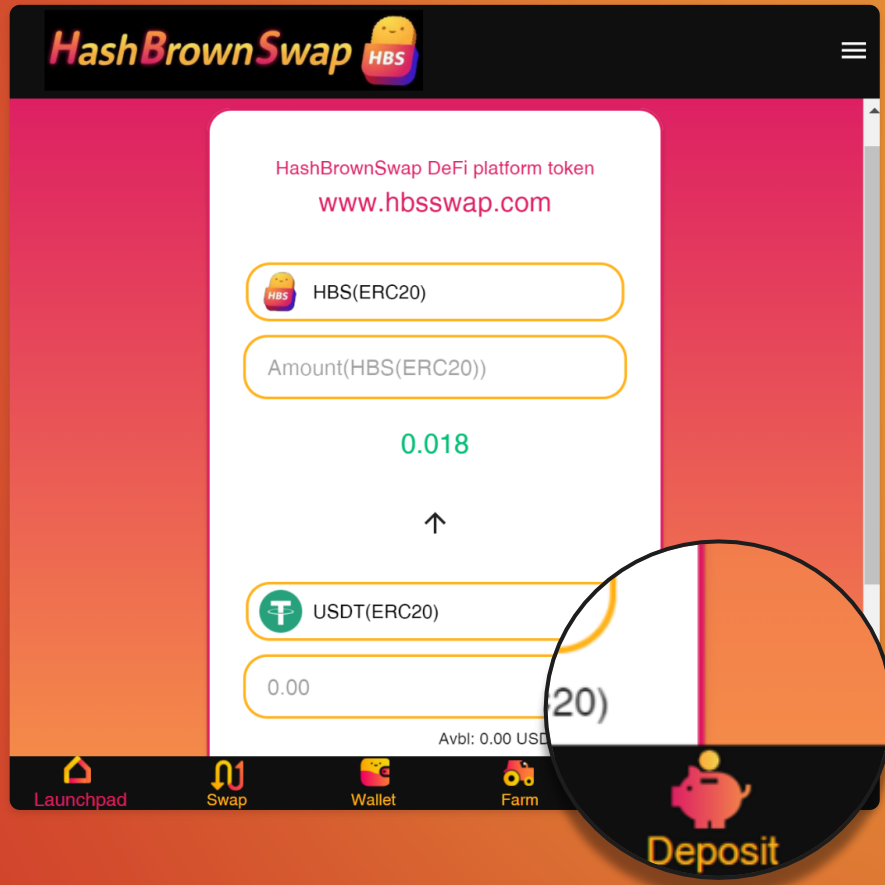

- > Display project name & website
- > Automated token purchase

## Cross Chain Liquidity

- > Free swap HBS ERC20 / HBS BEP20
- > Swap USDT ERC20 / USDT BEP20

# Crypto Banking

## Deposit & Lending

- > Collateralize HBS, BNB, ETH & BTC to borrow USDT
- > USDT deposit to earn USDT / HBS
- ① Ready to launch in Q1 2023

## Partner Banks

- > Quickly enter crypto banking
- > No investment in DeFi infrastructure

## Financial Institutions

- > Sell investment funds, equity/debt tokens
- > Operate DEXs and Security Token Exchanges on HBS
